PROFESSIONAL SUMMARY

Full Stack Developer with expertise in building scalable web applications and RESTful APIs using MongoDB, Express.js, React, and Node.js. Proven track record of optimizing system performance and reducing development time by 30% through efficient database queries and code optimization. Skilled in modern development workflows including Git, Docker, and CI/CD, with a focus on delivering seamless user experiences.

TECHNICAL SKILLS

- **Frontend** : React.js, HTML5, CSS3, Bootstrap, JavaScript, TypeScript**.**
- **Databases :** MongoDB (Mongoose), SQL (MySQL, SQLite), Query Optimization.
- **Backend :** Node.js, Express.js, RESTful API Integration, JWT Authentication.
- **Tools & Cloud :** Git, Docker, CI/CD, Postman, VS Code.

PROFESSIONAL EXPERIENCE

String Metaverse Limited Company January 2025 - Present
Software Developer

- **Optimized Financial Operations:** Conducted comprehensive data analysis on partner payouts to identify process inefficiencies, achieving a **15% improvement in accuracy** for financial transactions.
- **Dashboard Development:** Engineered and optimized a "lead-to-disbursement" funnel dashboard, providing critical business insights that drove operational decision-making.
- **Predictive Modeling:** Built predictive models for credit risk analysis and operational forecasting by synthesizing insights from large-scale datasets across product, risk, and collections teams.

Global Logic Technologies PVT Limited September 2023 — January 2025
Analyst

- **Process Automation:** Automated critical data workflows to **reduce manual tasks by 30%**, enabling real-time updates for Key Performance Indicators (KPIs).
- **Frontend Engineering:** Built and maintained responsive, user-friendly interfaces using **React.js and Bootstrap**, ensuring cross-device compatibility and enhancing user engagement.
- **System Accuracy:** Collaborated with cross-functional teams to implement robust risk and partner payment tracking features, resulting in a **20% increase in reporting accuracy**.
- **Business Monitoring:** Developed dynamic dashboards to monitor business health, integrating complex metrics to drive program and process improvements.

KEY PROJECTS

Web3 Automated Trading Bot Platform | *Node.js, MongoDB, Solana Web3.js, Raydium SDK* .

- **Architecture**: Developed a backend-driven automated trading system monitoring real-time crypto prices to execute token swaps on Raydium DEX pools.
- **Concurrency Handling:** Engineered a swap queue system with retry logic and exponential backoff to prevent duplicate transactions and ensure 99.9% uptime during high volatility.
- **Security**: Implemented secure wallet management and JWT authentication with role-based access control for admin and sub-admin permissions.

Full-Stack App with Telegram Bot | *Node.js, Express.js, MongoDB, Telegram API*

- **Integration:** Built a full-stack application integrating a Telegram bot for real-time user notifications and automated interactions.
- **Security:** Designed RESTful APIs for secure user authentication (Login/Signup) and managed environment variables for secure deployment.

EDUCATION

- **Master of Computer Applications (MCA)** | *Manpower Development College (Osmania University)* August 2022 — October 2024 | CGPA: 7.65
- **Bachelor of Science (MPCS)** | *Vivekananda Govt Degree College (Osmania University)* June 2019 — November 2021 | Percentage: 74.40%
